POLICE IN CRUSADE AGAINST SPEEDERS

Mysterious Killing of Harry Latimer Causes Active Measures.

DR. TOM A. WILLIAMS PUTS UP COLLATERAL

G. W. Steele of Army and Navy Club Also Is Charged With Fast Driving—Many Caught.

Police of the seventh and tenth precincts have been active during the past few days in the arrest of violators of the speed law.

The killing of Harry Latimer on the Rockville pike Wednesday night, and the flight of the automobile which struck him, has spurred on the police. The identity of the car has not been learned.

The police and Sheriff Whalen of Montgomery county, Md., are making every effort to uncover the culprit. A supposed description of the car is being obtained. There is certainly a great deal of interest in the case.

War to Be Waged.

The police will continue to wage war against speeders and violators of other regulations which offer protection against traffic accidents. The police regard as one of the more important sections of the traffic laws that which requires vehicles to be stopped at least fifteen feet from street cars while the cars are taking on or off passengers.

On the pike Wednesday night obeyed that injunction, it is assumed, Mr. Latimer had just alighted from a street car, observers state, when the automobile, which was approaching and knocked him down. The car did not stop, the police were told, but apparently increased speed and disappeared.

Those who were arrested yesterday afternoon and last night by the police in connection with the speeding car described in the Police Court tomorrow.

SECURITY LEAGUE INDORSES PROGRAM

Committee Believes, However, Administration Has Not Gone Far Enough.

CONTINENTAL ARMY IS "ONLY THE FIRST STEP"

Navy Plan Criticized as Too Long Extended and Lacking Provision for Personnel.

CHICAGO, November 27.—The proposed program of President Wilson was indorsed as a "first step" in the right direction in committee reports on the army, the navy and the militia, read before a conference of the National Security League here today.

On each aspect of the problem, however, the committee findings were that the administration had not indicated a desire to go far enough to make the country safe from attack.

The proposed army increase, it was pointed out, should be broadened to provide for officers and for collection of large reserve stocks of supplies of all kinds.

Senator James Reed of Missouri, who was on his way to Washington, was invited to attend the meeting. In a few impromptu remarks he said that Congress probably would throw into the waste basket any detailed suggestions which the league might make.

The project for a "continental army" was indorsed merely as a "first step," and a suggestion was made that all men between the ages of eighteen and twenty-one should be enrolled and have military education.

Delegates were present from more than half a hundred cities and counties, and the representatives of branches of the league including governors, former governors, several city executives, educators, business men and editors.

Should Resume Second Rank.

The report of the navy committee began with a strongly worded wish that the league go on record as believing "that the American navy should at once be restored to the position of second naval power, which it held but a few years ago."

The committee said this work should be undertaken "immediately." The report added:

"The league believes that an essential weakness in the proposed increase of our naval establishment, as reported in the press, lies in the failure to provide for an adequate increase in the personnel."

Figures were then quoted tending to show that the navy is short between 50,000 and 55,000 men of the number required to man the
